

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light greenish-blue. They are positioned diagonally, with the blue one partially covering the green one.

Cybersecurity Integrated into a Christian Life

Nate Flasher

My Thoughts

What went well :

- Time management
- Content
- Professionalism

What could have gone better:

- Length (More research)
- Mental health

Introduction

- How recent and new technology and cybersecurity really is.
- Defining cybersecurity for the purpose of the paper.
- Why there has been a need for cybersecurity.
- 2019- 467,000+ cyber complaints, 3.5 billion dollars in losses.
- Paper's goal is to research and help explain how a Christian can effectively incorporate cybersecurity into their lives.

The Situation at Hand

- Because of how complex cybersecurity is, that can make it quite complicated to incorporate into a Christian worldview.
- Applying what the Bible has to say about a major such as ministry can be much easier than applying it to cybersecurity.
- There was nothing close to computers during the times of the Bible.

A Biblical View of Cybersecurity

- Main reasons to live a life with a passion for cybersecurity and let it be glorifying to God.
- Arguments against reasons that cybersecurity is not an adequate field of study for the Lord.
- Most important section of my paper in my opinion.

Security and Sin

- Define hacking for the purpose of the paper.
- Explain the differences between white hats and black hats.
- “Hacking is a digital form of breaking and entering. Instead of invading a home or business, hackers invade computer systems”
- How God views black hats vs white hats.

Security at its Roots

- How there is a connection between a career in cybersecurity and an attribute (protection) of the Lord's.
- Daniel 16-22 as an example of God's demonstration of protection.
- The practice of protecting others in the field of cybersecurity is an imitation of God's protection He offers as well.
- By reflecting who God is we honor and glorify Him.

Cybersecurity, Ethics, and the Workplace

- Explain human error and the mistakes that inevitably come with coding.
- Explain the lack of motivation for coders in the workplace and why that is.
- Explain why ethics then become so important.
- Explain why companies would benefit from most Christians because of the ethics they have due to the Lord's standards.

Final Words

- What I discovered and concluded.
- I'm happy to say the Lord fully supports cybersecurity incorporated into His followers live's.
